Summary

I am a professional, hardworking, and highly motivated with an excellent work ethic and good interpersonal skills. As a Software Engineer, I love coding and find the opportunity to write programs as a fascinating way to improve people's life.

Work Experience:

October 2021– present: **Software Engineer** - Nice Actimize

- Designed, developed, integrated, tested, deployed, and monitored robust, large-scale cloud-based SaaS microservices on the X-Sight platform for Actimize Cloud-based solutions, consumed by entire R&D groups.
- Worked closely with Data, Security, and DevOps teams to define and execute clear SaaS/IaaS/PaaS strategies, ensuring the rapid delivery and deployment of efficient, high-quality solutions.
- Utilized a tech stack comprising: Java (Spring Boot), scripts in Python, Big Data: Kafka, Databases: DynamoDB, PostgreSQL, Redis, Cloud technologies: AWS (EKS, MSK, IAM), Kubernetes, Docker.
- Engaged in DevOps practices using Jenkins, Terraform, and monitored/observed systems using Datadog, Coralogix, and Lens.
- Ensured security compliance and best practices with tools like Wiz, Veracode, and SonarQube.
- Worked with various tools including Git, Maven, Swagger, and Jira.

September 2019 – October 2021: **Software Engineer** – Asperii/PetSmart

- Involved in the entire lifecycle of projects, encompassing requirements gathering, design, analysis, coding, integration, and testing of applications.
- Gained hands-on experience in Java, designing, and developing high-volume web services using API protocols and data formats like REST, JSON, and SOAP.
- **Relocated to the United States, where I contributed as a Software Development Engineer (SDE) for PetSmart.** Played a key role in the American team that developed the pet services platform for hotels.
